## Logic and Language: Exercise (Week 6)

Orestis Melkonian [6176208], Konstantinos Kogkalidis [6230067]

## 1 Syntax

## 1.1

First, we define the rules of rightward extraction  $\widehat{\alpha}_{\diamond}^r$ ,  $\widehat{\sigma}_{\diamond}^r$ :

$$\frac{f:A\otimes (B\otimes \Diamond C)\to D}{\widehat{\alpha}_{\diamond}^r f:(A\otimes B)\otimes \Diamond C\to D} \qquad \qquad \frac{f:(A\otimes \Diamond C)\otimes B\to D}{\widehat{\sigma}_{\diamond}^r f:(A\otimes B)\otimes \Diamond C\to D}$$

We can now proceed with the derivation of

$$n \otimes ((n \setminus n)/(s/\Diamond \Box np)) \otimes ((np/n) \otimes n) \otimes ((np \setminus s)/np)) \to n$$

as follows:
